Amendments to the Claims

The following listing of claims will replace all prior versions, and listings, of claims in

the application.

1-33. (Cancelled)

34. (New) A composition comprising dead E. coli containing therein at least one modified

peanut allergen whose amino acid sequence differs from that of a wild-type peanut allergen that

occurs in nature such that the modified peanut allergen has a reduced ability to bind to or cross-

link IgE as compared with the wild-type peanut allergen.

35. (New) The composition of claim 34, wherein the wild-type peanut allergen is Ara h 1

(SEQ ID NO:1).

36. (New) The composition of claim 34, wherein the wild-type peanut allergen is Ara h 2

(SEQ ID NO:2).

37. (New) The composition of claim 34, wherein the wild-type peanut allergen is Ara h 3

(SEQ ID NO:3).

38. (New) The composition of claim 34, wherein the sequence of the modified peanut

allergen differs from the sequence of the wild-type peanut allergen by one or more amino acid

deletions, substitutions or additions within an IgE binding site of the wild-type peanut allergen.

39. (New) The composition of claim 38, wherein the sequence of the modified peanut

allergen lacks a portion of the wild-type peanut allergen sequence, and wherein said portion

includes an IgE binding site.

40. (New) The composition of claim 34, wherein the modified peanut allergen is located in

the cytoplasm of the dead *E. coli*.

41.	(New)	The compos	sition of claim	34, where	in the	modified	peanut	allergen	is	located	in
the per	riplasm	of the dead E	E. coli.								

42. **(New)** The composition of claim 34, wherein the modified peanut allergen cannot be detected by antibody binding without disrupting the dead *E. coli*.
